About Seabury Consulting Cargo Advisory

Seabury Cargo Advisory is a practice area of Seabury Consulting, part of Accenture, and a leading advisor to the global air freight and broader transportation industry. The practice advises many of the world’s best performing airlines, shipping lines, integrators, forwarders, airports, leasing firms, etc. A dedicated data analytics and business intelligence team is responsible for providing leading industry databases to our clients, including comprehensive air and express cargo demand and supply databases and forecasts. The data analytics team operates from offices in Amsterdam and Kuala Lumpur and aims to provide top class customer service and continuously improve and innovate existing and new products to continue our steep growth curve.

About the function

We are looking for exceptional and highly motivated data professionals to join the KL team to further grow our capabilities and expand our presence in APAC. The KL team is

responsible for developing, maintaining, and managing Seabury's market intelligence products.

As a Seabury analyst you work across the whole data analytics spectrum including data analysis, data modeling, machine learning, and database development. A particularly important aspect of the job is to keep our databases up to date and maintain the highest standards of data quality. To be successful in this role you need passion for data. You probably have a background as an analyst, developer or data scientist, however you may come from a different field with a strong emphasis on numerical analysis.

Experience from the industry is not essential however a strong desire to build knowledge about the aviation and transportation industries is a must. Most importantly you need to be forward thinking and pragmatic with a healthy curiosity for all things data.

The tight-knit team is focused on delivering high end results in a supportive and fun environment. You will develop your analytical, technical and communication skills as well as your industry knowledge. The learning curve will be steep but rewarding, and you will build a foundation of skills and experience which will prepare you for a range of more senior roles.

Responsibilities

- Develop data products. Be part of our Agile development teams and further develop our products using technologies like Microsoft SQL Server, Azure, Python, R, and machine learning
- Routinely identify outliers, implement corrections and benchmark against other data sources to ensure Seabury has accurate data for its clients
- Keep up to date with current industry trends reported in various industry publications to ensure domain expertise with the data being analyzed

Qualifications

Desired Skills & Experience

- Experienced analysts, with a minimum 1-2 years' work experience in an analytical role preferred
- Minimum bachelor's degree in Applied Science/Applied Mathematics/Economics/Business Administration/Business Information Systems, or relevant degrees with a strong focus on math or data
- Highly self-motivated, self-directed, and attentive to detail
- Experience from Microsoft SQL technology, including Azure, SSIS, and SSAS. Although we will consider candidates with experience from a different analytics stack
- Excellent written and verbal English communication skills
- Applicant must possess the right to employment in Malaysia

You will also have opportunities to hone your functional skills and expertise in an area of specialization. We offer a variety of formal and informal training programs at every level to help you acquire and build specialized skills faster. Learning takes place both on the job and through formal training conducted online, in the classroom, or in collaboration with teammates. The sheer variety of work we do, and the experience it offers, provide an unbeatable platform from which to build a career.
